ABOUT ME

I'm a passionate and ambitious Frontend Web Developer, who thrives on collaboration and continuously improving my skills. With a hunger for knowledge and a desire to stay ahead of the curve in cutting-edge technology, as a developer I'm always on the lookout for opportunities to enhance both my programming and soft skills. My determination to grow and build memorable interactive experiences makes me a valuable addition to any team.

SKILLS

Frameworks
- React

Frontend /Web Development
- HTML,CSS,SASS Javascript, and React
- Debugging and testing code
- Accessibility
- Responsive usability for all devices
- WordPress / Drupal9

Tools
- DevTools
- Git
- Lando
- Figma

Software
- VScode
- Adobe Illustrator
- Adobe Photoshop
- Microsoft Excel
- Affinity Designer
- Affinity Photo
- Filmora

PaaS
- Platform.sh

CMS
- WordPress
- Drupal9
- Squarespace

Work OS
- Jira
- Slack
- Zoho
- Cliq
- Monday

Community
- GitHub
- Discord
- Reddit
- Stack Overflow

AI
- Bard
- Chatgpt4

API
- RapidAPI
- OpenWeather API

EXPERIENCE 3 experience in coding

Frontend Web Developer / content authoring & QA testing (current)

100% Remote

MINDSING / December 2022 –now

Clients: Riskified, Hiscox

- Develop and maintain the website's frontend, using HTML, CSS, and JavaScript to create responsive, user-friendly interfaces that meet the needs of the business and it's users.

- Developing responsive websites that work well across all devices, including desktops, laptops, tablets, and smartphones.

- Collaborating with other team members, such as designers, back-end developers, and project managers, to ensure that web projects are completed on time and to specification.

- Using Jira to manage and track my work. Creating and updating tickets, assigning tasks to team members, and track progress using agile development methodologies.

- Adapting existing code to create new features or improve existing ones.

- Working with Drupal 9 and Wordpress to create, edit, and manage content on the website, ensuring that it is up-to-date and accurate. I also work with theming system to customize the website's appearance and layout, creating a cohesive and consistent user experience.

- Staying up-to-date with the latest trends and technologies in web development, such as new programming languages or development frameworks.

QA Regression Testing

- Performing regression testing using Jira and Drupal 9 to ensure the quality of our clients website. I collaborated with developers to understand the scope of changes made in each release, and identified test cases for each feature.

- Creating test plans and test cases for the regression tests. I ensured that each test case covered all possible scenarios to identify any bugs or defects. I also created bug reports in Jira and followed up with the development team to ensure that the issues were resolved in a timely manner.

- After each round of regression testing, I provided detailed reports to the project team, including any issues found and their severity levels. I also suggested improvements to the testing process to increase efficiency and effectiveness.

Continuing Education

Aug 2022 –now

- I have been dedicating my time to learning and building with Next.js and React. I have been studying their core concepts, such as server–side rendering, static site generation, and component–based development. I have also been building personal projects, such as a portfolio website, to solidify my understanding of these technologies.

Bug Fixing:

- I have gained extensive experience in identifying and fixing bugs. I have a strong attention to detail and am committed to delivering high–quality work. I have worked on projects where I had to analyze code, replicate the issue, and find solutions. I have also worked closely with senior developers to understand complex issues and learn new debugging techniques. I am comfortable working in a fast–paced environment and prioritize fixing bugs to ensure the best possible user experience.

Overall, by continuing to learn and refine my skills in building with Next.js and React, and fixing bugs, I am confident in my abilities as a Junior Frontend Web Developer.

EDUCATION AND TRAINING

Certificate: Frontend Engineer

Codecademy Jul 2022

Suwanee, GA

PLATFORM.SH

Certificate: Developer

June 3 2022

Suwanee, GA
